AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently amended) A single-ply or multi-ply sanitary tissue product comprising a fibrous structure comprising a surface comprising a fiber flexibilizing agent system comprising a fiber flexibilizing agent and an opacity increasing agent wherein the net change in opacity of the fibrous structure resulting from the fiber flexibilizing agent system is greater than the net change in opacity of the fibrous structure resulting from the individual components of the fiber flexibilizing agent system, wherein the fiber flexibilizing agent and the opacity increasing agent are present in the fiber flexibilizing agent system at a weight ratio of from about 2:1 to about 100:1.

Claim 2 (Currently amended) The <u>single-ply or multi-ply sanitary tissue product</u> fibrous structure according to Claim 1 wherein the fibrous structure further comprises a cellulosic fiber.

Claim 3 (Currently amended) The <u>single-ply or multi-ply sanitary tissue product</u> fibrous structure according to Claim 1 wherein the fiber flexibilizing agent is selected from the group consisting of humectants and plasticizers.

Claim 4 (Currently amended) The <u>single-ply or multi-ply sanitary tissue product</u> fibrous structure according to Claim 3 wherein the plasticizer comprises a polyhydroxy compound.

Customer No. 27752

Claim 5 (Currently amended) The single-ply or multi-ply sanitary tissue product fibrous

4 /9

structure according to Claim 4 wherein the polyhydroxy compound comprises

polyethylene glycol.

Claim 6 (Currently amended) The single-ply or multi-ply sanitary tissue product fibrous

structure according to Claim 5 wherein the polyethylene glycol has a weight average

molecular weight of from about 100 to about 500 g/mol.

Claim 7 (Cancelled)

Claim 8 (Currently amended) The single-ply or multi-ply sanitary tissue product fibrous

structures according to Claim 1 wherein the opacity increasing agent is selected from the

group consisting of: particulates, pigments, fillers and mixtures thereof.

Claim 9 (Currently amended) The single-ply or multi-ply sanitary tissue product fibrous

structure according to Claim 1 wherein the opacity increasing agent is selected from the

group consisting of: clay, calcium carbonate, titanium dioxide, talc, aluminum silicate,

calcium silicate, alumina trihydrate, activated carbon, pearl starch, calcium sulfate, glass

microspheres, diatomaceous earth, and mixtures thereof.

Claim 10 (Currently amended) The single-ply or multi-ply sanitary tissue product

fibrous structure according to Claim 1 wherein the increase in opacity of the fibrous

structure resulting from the fiber flexibilizing agent system is 0.05% points greater than

the net increase in opacity of the fibrous structure resulting from individual components

of the fiber flexibilizing agent system.

Claim 11 (Cancelled)

Customer No. 27752

Claim 12 (Currently amended) The single-ply or multi-ply sanitary tissue product

fibrous structure according to Claim 1 wherein the fiber flexibilizing agent is present in

the fibrous structure at from about 2% to about 30% by weight of the fibrous structure.

Claim 13 (Currently amended) The single-ply or multi-ply sanitary tissue product

fibrous structure according to Claim 1 wherein the opacity increasing agent is present in

the fibrous structure at from about 0.02% to about 15% by weight of the fibrous structure.

Claim 14 (Cancelled)

Claim 15 (Currently amended) A method for making a single-ply or multi-ply sanitary

tissue productfibrous structure, the method comprising the steps of:

a) providing a single-ply or multi-ply sanitary tissue product comprising a

fibrous structure comprising a surface;

b) contacting the surface of the fibrous structure with a fiber flexibilizing

agent system comprising a fiber flexibilizing agent and an opacity increasing

agent such that the net change in opacity of the fibrous structure resulting from

the fiber flexibilizing system is greater than the net change in opacity of the fibrous structure resulting from the individual components of the fiber

flexibilizing agent system, wherein the fiber flexibilizing agent and the opacity

increasing agent are present in the fiber flexibilizing agent system at a weight

ratio of from about 2:1 to about 100:1.

Claims 16-18 (Cancelled)
